UNMATCHED DISTINCTIVE STYLE

“ CREATIVE COMBINATION OF DECOR STYLES MAKE FOR A UNIQUE ABODE ”

Multiple decor styles were used in the design of this four-room apartment to manifest the owners' unique sense of style.

Common throughout the apartment is the Scandinavian mantra of simplicity, minimalism and functionality. This style is most prominent in the dining area and kitchen, where ample storage and counter-top space makes it perfect for preparing everything from simple family meals to elaborate dinner parties.

Complementing the simplicity of the dining area is the colour-block style of the TV wall which reflects the owners' sense of fun. Without even trying, this wall is a definite conversation starter with any visitor. Another head-turner in this apartment is one door which has been turned into a large chalkboard, giving the owners the opportunity to have a whimsical message or design according to the mood or emotion of the day.

In the bedrooms, functionality meets contemporary style. Cabinetry is cleverly incorporated into the design to provide much-needed storage space. The master bedroom even features a multi-functional platform area that apart from providing storage also acts as a window seat to kick back with a good book and enjoy the natural light. The bathroom also features a contemporary style with its mix and match of coloured tiles.

Different interior decoration styles work only if tied together by similar shades of colours used in the different styles, and in this particular home, IDID PTE LTD were able to capture that to create a distinctive look for the owners to call home.
