

ATT-475 allows a ceiling mounted projector to be used for 2 screens. The motorized ATT-475 is designed to turn 90° such that 2 screens mounted on different sides of the room can be projected selectively. This will save space and eliminate the need for a second projector, hence reducing cost.

ATT-475 is one of the first of its kind in AV industry. It comes complete with a RF remote control and can also be controlled by other room control system.

Specification

Overall Dimension	:	430mm(W) x 430mm(L) x 202mm(H)
Ceiling Opening	:	364mm(W) x 310mm(L)
Load Weight up to	:	TBA

Features

- Can be concealed in ceiling
- Motorized 90° degree turn for mounted projector
- RF remote control or third party controller
