

PLT - 416

Remaco PLT-416 is a projector lift for keeping projector in the false ceiling. When in operation, the lift will be lowered to your desired position. After using, the lift will be raised to keep the projector out of sight into the false ceiling creating a neat working environment.

The lift is controlled by the provided MPC-852 Motor Power Controller. With MPC-852, the lift can be controlled by RF remote via AVA-316 15 Channel RF remote controller and also by a provided AVA-200 wall switch. Third party control system such as AMX or Crestron can also be used to control the lift through our MPC-852 by providing a dry contact closure.

The multi-ways of control allows Remaco lift to be very flexible and user friendly.

SPECIFICATIONS

Dimension	:	700mm x 508mm
Weight	:	30kg
Maximum Load Capacity	:	50kg
Ceiling Opening	:	815mm x 545mm
Power Consumption	:	185watts
Voltage	:	230VAC
Travel Distance	:	Up to 3200mm
Total Height (Kept Position)	:	483mm to 683mm
Total Height (Fully Extended)	:	3453 mm to 3653mm
Colour	:	White
